

Extend Device Lifecycle, Enhance Security with Honeywell Mobility Edge™

As seen in the [10 Key Challenges of Enterprise Mobility](#), Honeywell's customer research revealed that our customers need a better, secured way to deploy and manage their mobile solutions.

How have we helped them solve this challenge?

By taking a completely new approach to enterprise mobility.

Mobile Device Security and Longer Lifecycle Matters

After talking to our customers, we completely rethought our approach to the challenges of supporting a mobile workforce. We quickly realized that no new simple technology upgrade was enough. Our customers needed something more comprehensive and dynamic – a mobile platform that is:

INTRODUCING MOBILITY EDGE

A Unified, Dynamic Mobile Platform from Honeywell

Mobility Edge™ helps companies **overcome complexity** to build, manage, and deploy mobile solutions across the enterprise – **faster, with less risk, and less cost.**

Accelerate Deployments

VALIDATE ONCE. DEPLOY EVERYWHERE. FASTER, EASIER, AND AT A LOWER COST.

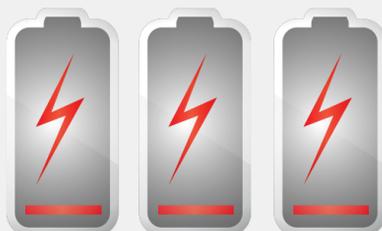

A rapid provisioning suite makes mobile deployments faster, easier, and lower cost. Validate new apps and updates once, then deploy across all form factors – instead of a burdensome process for each different device.

Optimize Performance

PRODUCTIVITY-OPTIMIZING TOOLS. FASTER DATA CAPTURE AND SECURE, ENHANCED WORKER COMMUNICATIONS.

With Mobility Edge, you can drive device performance for greater efficiency and worker productivity. Powerful, embedded tools help workers capture data faster and communicate easily and securely.

Extend Lifecycle

FORWARD-COMPATIBLE. FUTURE-PROOF. REDUCING TCO AND MINIMIZING HEADACHES.

Device Android version compatibility drives lifecycle duration. The only way to receive the latest features, including security, is to maintain the latest Android version. New security and privacy features are not added to prior Android versions, not even through purchased OEM life extension services. Mobility Edge consistently leads the market in forward Android version compatibility.
