

Elo Handheld Mobile Computers

Work smarter not harder with the Elo M50 handheld computing device. This enterprise-grade mobile computer provides an ergonomic design ready to be placed in the hands of store associates.

Built for commercial use, Elo's handheld M50 mobile computers help customers checkout table-side, in line or wherever they are in the store when paired with the Ingenico IPP457C, Verifone E355 or other payment sleds. The M50 provides a convenient and expedited payment solution essential to enhancing the customer experience and maintaining customer loyalty.

The M50 features an integrated Zebra SE4710 2D barcode scanner perfect for retail, hospitality, warehouse and logistic applications.

With the Elo M50 handheld device, customers have access to an Android-based platform to help businesses modernize and align each touchpoint in-store, while simplifying deployment, management and security systems for a truly unified and interactive solution. Elo handheld leverages EloView, Google Zero Touch and QR code scanning capabilities for simple and effortless integration with a variety of third-party mobile device vendors.

With a variety of accessories like a four-slot device charger, durable hand strap, barcode scanner, fixed workstation and docking station, users receive a powerful, versatile device with endless possibilities.
