

HP Engage One Pro AIO System

Designed to elevate your customer experience, the HP Engage One Pro AIO System is a sleek and durable POS system that offers an abundance of deployment options so you can tailor it to meet your needs.

Built specifically for the retail and hospitality markets, the HP Engage One Pro has the greatest performance range of any point-of-sale system. Units can be configured from the Intel® Celeron up to the Intel Core i9 processor to help power essential business operations, boost performance and create seamless customer interactions.

The Engage One Pro brings extreme flexibility and customization to your operation. It has three screen sizes and four mounts to choose from. With full-range tilt and height adjustability and a variety of hub compatibilities, it's the POS system designed to meet your specific business needs.

Devices are designed to pass rigorous military standard testing, resist dust and liquid intrusion and withstand frequent sanitization to ensure greater operator efficiency and functionality. With advanced security features, the Engage One Pro helps keep your data, devices, and customers safe and protected.

The Engage One Pro's purposeful design meets sophisticated craftsmanship in a sleek aluminum terminal. With hidden cable management, you can keep your space clutter-free for optimized productivity. It also comes with the optional Intel vPro so you can manage your system remotely and experience full visibility into the operations.

Benefits of the HP Engage One Pro AIO System

- 6.6-inch diagonal compact LCD display that integrates easily into any retail environment
- Depending on stand, adjustable height and swiveling of the display head to position as needed
- A USB connector powers the display and eliminates the need for additional cabling
