HP Engage Flex Mini

An operations powerhouse that fits anywhere, the HP Engage Flex Mini is designed to drive every facet of your business. From back-office operations to digital customer engagement, the HP Engage Flex Mini offers endless configuration options to meet evolving customer expectations.

Built for retail, hospitality, healthcare, manufacturing and transportation industries, the Engage Flex Mini brings the power and performance needed to meet customer demands. With its versatile and compact design, businesses can drive both front-of-store and back-of-house operations, including point-of-sale, digital signage, surveillance system and computer workflows, using just one system.

The Engage Flex Mini is durable, endlessly configurable and delivers a seamless operation without taking up valuable space. With two configurable I/O ports and an abundance of options across storage, memory and processor, the Engage Flex Mini offers maximum versatility to meet your unique business goals.

Powered by 10th generation Intel® processors to seamlessly drive business operations and deliver dynamic experiences. The Engage Flex Mini is equipped with the computing power needed to run sensor-based Edge solutions including customer engagement, theft detection and promotion, inventory and workforce management.

The Engage Flex Mini is built to last. The system is designed to pass rigorous military-standard testing to ensure greater operator efficiency and functionality. Safeguarded with HP's most advanced security features, protecting the system BIOS, user browser sessions and security checks to keep critical processes running, even if malware tries to shut them down. These security systems include HP BIOSphere Gen6, HP Sure Start, HP Sure Run, HP Sure Click and more.
