

HP Engage Go 10 POS

With versatility to delight both employees and customers, the HP Engage Go 10 can seamlessly transition from an all-in-one countertop POS to a sleek and light mobile tablet designed to optimize the customer experience while keeping employees agile and efficient.

Built for today's demanding business landscape in retail, healthcare and hospitality, the Engage Go 10 is durable, highly secure, ideally sized and integrates key accessories so employees can conduct business wherever and however they prefer. With its flexible design, employees can go from at-the-counter checkouts to in-aisle inventory checks and even curbside transactions using just one system.

The Engage Go 10 offers industry-leading security for devices and data. Safeguarded with HP Wolf Security for Business features, employees receive standard, automatic updates and security checks, including HP BIOSphere, HP Sure Start, HP Sure Run, HP Sure Click and more. With the included HP Smart Dock software, employees can customize unlock procedures, track devices and manage system permissions to reduce opportunities for theft and protect devices.

Run demanding software solutions and get customers quickly on their way with an 11th generation Intel® Core™ processor that delivers powerful performance and productivity. With a 10-inch diagonal screen and familiar operating system, employees enjoy an easy-to-use mobile system that can run common, non-mobile apps.

HP Engage Go systems are built to last. Devices are designed to pass rigorous military standard testing, resist dust and liquid intrusion and withstand frequent sanitization to ensure greater operator efficiency and functionality.
