

Honeywell CT45/CT45 XP Rugged Mobile Computers

The Honeywell CT45 and CT45 XP are powerful, versatile, easy-to-use handheld mobile devices designed for workers across the retail supply chain including logistics, warehousing, in-store retail and last-mile delivery.

Built to support workers who are always on-the-go, Honeywell CT45 and CT45 XP ruggedized handheld devices offer an all-purpose productivity tool that delivers reliable performance and superior connectivity. They offer greater usability than enterprise class devices to help boost efficiency and productivity.

The CT45 family uses the newest generation of Honeywell's Mobility Edge™ platform to support the security and longevity companies need in mobile devices. Mobility Edge allows companies to test and validate applications, accelerate deployments across the organization, optimize device performance, simplify maintenance and extend the lifecycle of their hardware.

Embedded with the latest Wi-fi 6 technology, the CT45 family delivers faster, more reliable connections even in device-heavy distribution centers, warehouses and retail stores. And with 4G-LTE capabilities, mobile teams can keep each other connected to crucial information in order to place orders, check stocks or status, scan or deliver items anywhere at any time.

The CT45 and CT45 XP feature a sleek, ergonomic and compact design. A protective boot allows for increased durability, helping devices withstand challenging environments, normal wear and tear and accidental drops.

Integrated with Powerful Software Solutions

- Honeywell Mobility Edge Platform
- Honeywell Operational Intelligence asset optimization
- Smart Talk unified communications
- UEM
- WMS
- Retail
- ERP

Benefits of the CT45 XP/CT45 Mobile Computers

- Ergonomically designed
- Pocketable, yet rugged
- Integrated with Honeywell's FlexRange™ Scan image, a 13-megapixel auto-focus camera and 8-megapixel front-facing camera for accurate data capture
- Designed with a Gorilla 5 screen to sustain a 6-foot drop to concrete
- Secondary Bluetooth Low Energy beacon enables workers to locate and find a lost device when the battery is dead
- Three microphones with noise cancellation for efficient communication
