

Honeywell 8675i Wearable Scanner

The Honeywell 8675i is a compact, rugged and ergonomic wearable scanner that is always at hand to improve workflow productivity.

Designed to deliver reliable results in demanding workflows, the 8675i is a rugged and compact wearable scanner that offers high-performance scanning to help boost user efficiency. The 8675i is equipped with FlexRange™ technology and FlexRange™ scan distance, enabling a smoother, faster and more intuitive scanning response – even when working with damaged or low-quality barcodes. And Honeywell’s Operational Intelligence makes configuring, monitoring and managing deployed devices simple and effortless.

Streamlined for ergonomics, the 8675i is ready to perform in a variety of fast-paced environments. To prevent workflow interference, the height off of the finger has been minimized and all user-contact surfaces have been tailored for comfort, easy adjustment and simple use. To increase operator ease, the 8675i can easily be customized from a right to a left-hand configuration. Additionally, the finger strap buckle features a low profile to help prevent interference between fingers.

The 8675i’s robust 2,000 X ½ meter tumble specification ensures that it is ready to endure the frequent knocks that wearable devices often experience. IP65 sealing and broad operating temperatures ensure operators stay efficient in demanding work environments and help mitigate the risk of moisture or particle intrusion.

Multi-shift ready, this productivity tool features an easy-to-replace smart battery to ensure the scanner is running and ready to perform. The 8675i’s user-facing LEDs communicate Bluetooth connectivity, the battery’s state of charge and even notifies users when the battery needs replacing, helping to improve ROI and maximize the device’s lifespan.

Integrated with Powerful Software Solutions

- Honeywell FlexRange™ Technology
- Honeywell FlexRange™ Scan Distance
- Honeywell’s Operational Intelligence

Benefits of the 8675i Wearable Scanner

- Ergonomically designed
- One size fits all, highly adjustable at index finger and wrist
- Lightweight, comfortable and highly ergonomic
- Designed to sustain a 6-foot drop
- Certified to meet IP65 standards for moisture and particle intrusion
- Broad operating temperatures (-20 to 50C, -4 to 122F)
- Produces 12,000 scans over a 10-hour shift
